## PROFESSIONAL SUMMARY

Full-Stack Software Engineer building production-grade, cloud-native applications end to end. Experienced shipping scalable, client-facing systems at Datadog and developing AI-powered features in startup environments. Independently delivered a complete cross-platform product spanning mobile and web frontend, .NET backend APIs, Azure infrastructure, multi-provider payments, and AI integrations.

## EXPERIENCE

**Full-Stack App and AI Integrations Developer — Teos Technology (Startup) | Denver, CO** 02/2025 –

- Designed and implemented AI-powered chatbot features using OpenAI models to deliver contextual, real-time user interactions
- Integrated OpenAI APIs into backend workflows with an emphasis on reliability, predictable behavior, and controlled automation
- Delivered production features across frontend, backend, and cloud infrastructure in a fast-paced startup environment
- Developed frontend features (HTML, CSS, JavaScript) and backend data workflows using SQL and reporting pipelines
- Supported customer use cases, diagnosed platform issues, and improved usability across client-facing surfaces

**Full-Stack Cross-Platform Software Engineer — LuvNote (Independent Project)** 09/2024 – Present

- Architected and deployed a full production stack: React Native + Expo frontend, ASP.NET Core Web API, PostgreSQL database
- Designed and implemented 50+ REST APIs using Clean Architecture, DTO contracts, dependency injection, and background services
- Built and evolved a PostgreSQL + EF Core data layer, managing extensive schema migrations and long-term data integrity
- Implemented multi-provider payments (PayPal, Apple IAP, Google Play) with secure webhooks and subscription management
- Integrated authentication, OAuth flows, CI/CD pipelines, Docker workflows, and 10+ third-party APIs (Spotify, Meta, Ticketmaster, OpenAI)

## EDUCATION

**Bachelor of Science in Computer Science — University of Colorado Colorado Springs (UCCS)**

Minor in Mathematics

3.65 GPA, *summa cum laude* | 05/2022

February 16, 2026

To Whom It May Concern,

It is my distinct pleasure to recommend **Christian Alexander**, following the successful completion of our six-month AI Software Engineering internship program. During his time with us at Teos Technology, Christian distinguished himself not only as a highly capable full-stack developer, but as a leader with the vision and initiative of a future entrepreneur. Our program is intensive and hands-on, requiring interns to contribute directly to production software while participating in weekly technical instruction and individualized mentorship. Christian consistently exceeded expectations in every dimension.

Most notably, Christian singlehandedly led the conversion of our existing React web application into a fully functioning React Native mobile application. This was not a superficial port, but a comprehensive architectural effort. He successfully reused our existing API layer, while thoughtfully adapting the front-end architecture for mobile platforms. In addition to development, Christian configured the CI/CD pipeline for cloud hosting, and ensured the mobile application met professional standards for deployment. He also represented the product publicly, conducting live demonstrations at an event to promote the application, a responsibility he handled with confidence and clarity.

Beyond his technical execution, Christian demonstrated mature architectural thinking across both software and database design. He showed a strong sense of ownership and accountability, consistently driving work forward without requiring oversight. When faced with complex debugging challenges, he approached them methodically and resolved them with skill. What further sets him apart is his entrepreneurial mindset. Christian contributed creative and strategic ideas for customer acquisition and marketing, reflecting a rare combination of technical depth and business awareness.

Christian also served as a leader among his peers. He frequently assisted other interns, offering guidance and technical insight while fostering a collaborative team environment. His curiosity, creativity, and ability to influence through competence and character made him a natural leader. He approached mentorship sessions with seriousness and intellectual engagement, tailoring his growth intentionally toward a leadership and entrepreneurial trajectory.

I recommend Christian without reservation. If I had the budget to expand my team today, I would hire him immediately and trust him with significant responsibility on mission-critical systems. He has the technical foundation, architectural judgment, initiative, and leadership capacity to excel as a full-stack developer and to grow into a technology leader. Any organization would be fortunate to have him.

Sincerely,

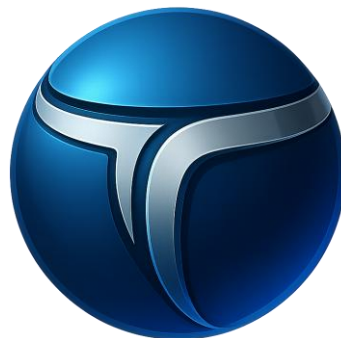

**Scott J. Swindell**

Teos Technology

**CEO & Founder**

Software Engineering Manager & Mentor

# CERTIFICATE OF ACHIEVEMENT

## TEOS TECHNOLOGY

This certificate is awarded to

*Christian Alexander*

for the successful completion of an extensive

**Artificial Intelligence Software Engineer**

Internship at Teos Technology.

Throughout the internship, **Christian Alexander** developed practical software engineering skills using AI-assisted development practices while contributing meaningfully to active software projects. This certificate acknowledges both technical achievement and professional contribution.
